# BALKAN MEDICAL JOURNAL

THE OFFICIAL JOURNAL OF TRAKYA UNIVERSITY FACULTY OF MEDICINE

Citation Abbreviation: Balkan Med J (Formerly Trakya Üniversitesi Tıp Fakültesi Dergisi)

## AIMS AND SCOPE

Balkan Medical Journal is an international journal publishing clinical and experimental studies, interesting case reports, invited reviews, letters to the Editor, meeting abstracts, news and bulletin, clinical news and abstracts of interesting researches conducted in all fields of medicine. The language of the journal is English. The journal is based upon independent and unbiased double-blinded peer-review principles.

The journal is the scientific publication of Trakya University Faculty of Medicine and published four times per year; in March, June, September and December. The journal is financed by Trakya University Faculty of Medicine.

The aim of the journal is to publish original articles with highest clinical and scientific quality at the international level. Moreover, reviews covering main innovations in medical education, Editorials, case reports and original images are also accepted for publication.

The target group of the journal is academicians, researchers, specialists and primary care physicians working in all branches of medicine.

Editorial and publication processes of the journal are conducted in compliance with ICMJE, WAME and COPE standards.

Balkan Medical Journal is indexed in Science Citation Index Expanded, Journal Citation Reports, EMBASE, Scopus, CINAHL, EBSCO, DOAJ, Chemical Abstracts, Index Copernicus and Tübitak/Ulakbim Turkish Medical Database.

### Subscriptions/Permissions and Reprints/Advertisements

Free full-text articles can be accessed from the following link: [www.balkanmedicaljournal.org](http://www.balkanmedicaljournal.org); with no charge. Applications for subscriptions, permissions, reprints and advertisements should be made to the Editorial Office.

### Editorial Office

## INFORMATION FOR AUTHORS

The Balkan Medical Journal is an international journal which publishes clinical and experimental trials, interesting case reports, invited reviews, letters to the Editor, meeting, news and bulletin, clinical news and abstracts of interesting researches conducted in all fields of medicine. The language of the journal is English. The journal is based upon independent and unbiased double-blinded peer-review principles.

The Journal is the scientific publication of the Trakya University Faculty of Medicine, and is published four times per year; in March, June, September and December.

The authors are responsible for the scientific content of the material to be published.

Manuscripts must only be submitted electronically through the following website: [www.balkanmedicaljournal.org](http://www.balkanmedicaljournal.org)

Only the papers that have not previously been published in any scientific publication are accepted for publication. Manuscripts that have been presented orally or as a poster must be stated on the title page with the date and the place of the congress.

All articles submitted for publication are peer-reviewed for their suitability for the Journal. Papers do not comply with the format of the Journal will be returned to the author without further review. Therefore, to avoid time and work loss, authors must carefully review the rules of the journal.

Manuscripts that comply with the main rules of the journal are sent to at least two reviewers from Advisory Board, and the reviewers are asked for opinion about the suitability of the paper for publication. The reviewed manuscripts are then re-reviewed by the Editorial Board and the publisher and volume of the manuscripts are arranged.

All submissions must be accompanied by a signed statement of scientific contributions and responsibilities of all authors and a statement declaring the absence of conflict of interests.

Any institution, organization, pharmaceutical or medical company providing any financial or material support, in whole or in part, must be disclosed in a footnote.

Manuscript format must be in accordance with the ICMJE-Uniform Requirements for Manuscripts Submitted to Biomedical Journals: Writing and Editing for Biomedical Publication available at <http://www.icmje.org>

The Advisory Board, Editorial Board and the Publisher have the authority to edit the manuscripts, request changes in the format of the manuscripts, and make reductions within the authors' knowledge in typographic control. Until the required changes and edits have been made, the papers will not be preceded for publication.

### Manuscript Sections

The manuscript file should include full and short title, key words, text, references, tables (each table on a separate page), figure legends (if any) in the mentioned order. Author names and their institutional information, figures and illustrations should not be present in the manuscript file.

Abstracts should follow the titles. For research articles, abstracts should be structured as follows; Objective, Material and Methods, Results, Conclusion, and should not exceed 200 words. The main text should be structured as follows: Introduction, Methods, Results, Discussion, Conflict of Interest Disclosure

and References. Abstracts of case reports should mainly include information about the case and should consist of a short and single paragraph. Only the abstract must begin on a separate page. Case reports should also be structured as Introduction, Case(s) and Discussion following the titles and abstracts.

### References

Reference listing must be in accordance with ICMJE standards and numbered consecutively at the end of the manuscript in the order in which they are mentioned in the text. Journal abbreviations should be in Index Medicus style. If there are more than six authors, it should be abbreviated with the use of "et al."

Authors should only cite the articles that they have directly used. Our journal does not approve the citations made from references of any other articles. If a reference is considered not to be directly cited, the reference(s) must be verified by the authors against the original documents by sending the photocopy of the first page(s). Any citation of unpublished work, of which the page as numbers could not be provided, such unpublished conference, symposium, and meeting presentations, is permissible.

### Tables, Figures, Graphics and Photographs

Tables, figures and graphics should not be embedded in the manuscript. Each table must be on a separate sheet. Figures, graphics and photographs must be submitted as a separate file in jpeg format in high resolution.

Table and figure legends must be placed at the end of the main text. Tables, figures and graphics must be cited in the text.

### Ethics

An approval of research protocols by ethics committee in accordance with international agreements (Helsinki Declaration of 1975, revised 2002-available at <http://www.vma.net/e/policy/b3.htm> <<http://www.vma.net/e/policy/b3.htm>>, "Guide for the care and use of laboratory animals" - [www.nap.edu/catalog/5140.html](http://www.nap.edu/catalog/5140.html)) is required for experimental, and clinical and drug trial studies.

For articles concerned with experimental research on humans, a sentence showing that the informed consent of patients and volunteers has been obtained following a detailed explanation of the procedures that they may undergo. All recognizable photographs of patients must be accompanied by a written permission of patient for reproduction.

In such studies, authors should clearly state the compliance with internationally accepted guidelines and the guidelines issued by the Republic of Turkey Ministry of Health and published in the Official Journal dated 29 January 1993 number 21480' Regulations Concerning Drug Research', and other more recently published rules laid out in governing statutes. They should forward a copy of the Ethic Committee Approval received from the relevant institution. In the manuscript, the procedures that have been performed to eliminate any pain, harm and distress in subjects should be clearly stated.

## EDITORIAL

### The impact factor of Balkan Medical Journal (formerly Trakya Üniversitesi Tıp Fakültesi Dergisi) is rising "Step by step, little by little"

The impact factors of the biomedical journals for the year 2010 have been announced recently by Thomson Reuters (1). For the year 2009, our journal ranked with an Impact Factor of 0.082 (2). Thankfully, it is risen to 0.093 for the year 2010 (1). No doubt, every editor wants his journal to have a high Impact Factor which is the most widely used bibliometric evaluation index. Although a hot debate on the validity of impact factor has been continuing (3,4), our academic promotion system is also partly based on impact factors. The impact factor is calculated as the total number of citations in a year divided by the number of published articles during the preceding two-year period. Thus, the impact factor in 2010 can be calculated as C/A, where C is the number of citations in 2010 to the articles (A) published in 2008 and 2009. Research articles, case reports, technical notes and reviews are among the citable items of a journal, whereas commentaries, editorials, letters to the editor are non-citable. Our journal showed 13% increase from 2009 to 2010, a positive yet small improvement that made us happy. As *The Alan Parsons Project*, a progressive rock band, in their song dated back in 1982 says "...I got to do something about it, step by step little by little". We have to do something more about it and certainly by larger steps. By the year 2011, journal's official language is English and we hope this will increase citations from other countries. For the records, our published papers are not behind the subscription barrier and are freely available online at journal's website [www.balkanmedicaljournal.org](http://www.balkanmedicaljournal.org), which enables authors to reach and read fulltexts in pdf form. Besides, we think the best way for improving citations is to improve the quality of published items. Despite several drawbacks, editorial peer review system is one of the important tools for evaluation and selection of high quality science. Nowadays, we are scrutinizing our peer-review system and planning some amendments, needless to say, by maintaining the balance between speed and quality.

The number of Turkey addressed journals rised from 31 in 2009 to 49 in 2010. Some of these journals with increasing impact factors are shown in Table 1. *Balkan Med J* is one of the two journals from Turkey in the field of general medicine, together with *Turk J Med Sci* listed in the Journal Citation Reports®. Among these, Balkan Medical Journal in the near future will take the advantage of its international vision and get better impact. I would like to once again thank to all contributors for their unstinted support which is essential for continued success of this journal.

Table 1. Some of the Turkish biomedical journals with rising impact factors listed in the Journal Citation Reports® by Thomson Reuters

Abbreviated Journal Title	Impact Factor Values		
	2009	2010	% change
TURKISH J PEDIATR	0.333	0.481	(44%)
EXP CLIN TRANSPLANT	0.595	0.832	(39%)
TURK J GASTROENTEROL	0.484	0.642	(32%)
TURK J MED SCI	0.163	0.210	(28%)
MIKROBIYOL BUL	0.286	0.338	(18%)
BALKAN MEDICAL JOURNAL (TRAK UNIV TIP FAK DE)	0.082	0.093	(13%)
ANADOLU KARDIYOL DER	0.378	0.407	(7%)
